- Write a paragraph on your opinion about how you think wealth should be distributed in your country. Give examples to support your ideas.
(130 words)

In my opinion, sharing wealth equally in Mexico is important. Right now, only a few people have the money to have a good quality of life, while many of the Mexican population struggle to have few opportunities. To fix this, I think we should have a rule where richer people pay more taxes. This money can be used for things like schools, hospitals, and better roads that can help everyone. We should also focus on helping people in poor areas, making voluntary work or even donations. For example, we can invest in education and training in rural places, so that people can have better jobs and opportunities. We should also encourage small businesses and help people start their own companies so that more jobs can be created. By making wealth more fair, we can make Mexico stronger and give everyone a chance to succeed. With these little steps, we can start making the wealth distribution in Mexico more equitable.
